PROJECT

Portfolio

- My portfolio represents who I am, and it showcases all of my projects. You can an explore my projects through my portfolio.
- Creating my portfolio, I learned to manage React Compounds and implement functionality using javascript furthermore, I gained a deeper understanding of State management and Hooks for animating changes.
- I used CSS and Bootstrap for styling my portfolio become I wanted to further enhance my css skills and build a strong foundation on this area and implemented a feature for sending messages.
- I ensured that it is fully responsive. This project has helped me acquire the skills necessary to create a responsive portfolio.

Admin-Dashboard

- I Designed and developed an interactive and responsive dashboard application using React to provide real-time analytics and data visualization.
- For specific purpose, e.g., sales tracking, revenue tracking, user engagement, etc.
- Ensured the dashboard was fully responsive and optimized for various devices and screen sizes, enhancing user experience on desktops, tablets, and mobile devices.
- And I used React charts to track sales, revenue.

TodoApp

- Here I built a TodoApp using React. It is a simple yet task management application
- .It allows users to manage their daily tasks efficiently by adding, editing, deleting, and marking tasks as complete.
- By the way I learn CURD and I style like WhatsApp dark mode theme and fully responsive.
